

What's Developing...

The third Eureka publication has been completed, and is available to the public. It is a Community Data 8-page brochure. It contains a wide variety of information including Education, Medical, Transportation, Organizations, Major Employers, Telecommunications, Recreation, and many more.

The hope is that with many varied written publications and website information people will learn more about Eureka, and the great things that we have here will not remain a secret.

Other written publications available at the Information Center are: The Eureka Pioneer Museum, Eureka Area Community Foundation, Church Directory and Services, McPherson County Hunting, Eureka South Dakota (general information), Eureka Resources, and Eureka Community Development Company.

Any businesses or individuals that wish to have copies of any of these can stop at the Information Center and pick up a supply.

Every attempt is made to keep the information correct and current. Any updates should be reported to the Eureka Development office to be included in future printings.
