

What's Developing

Kaitlyn Martinez has redesigned the Eureka website and has made it mobile friendly. The overall look of the website now has the same theme as the recently updated Eureka brochure and Eureka Resource booklet. It gives Eureka a brand – when someone sees any of these they immediately think of Eureka without even seeing the word “Eureka”. (Think Nike swoosh or McDonald arches.)

The website has a great amount of information and is continually growing. People out of the area use it when deciding on relocating. Some use it to find information about a specific business. Many use it for rental housing. Others use the calendars for meeting dates. Every facet of the site is used by someone at some time.

The website is often the first place some look for information about Eureka. It is interesting to hear people say “I know about Eureka because I’ve researched it through the website.”

With those thoughts in mind, it is extremely important that all information is current and correct. It is a great help when individuals report any updates so they can be made.

The Eureka website is at www.eurekasd.com and changes can be reported to Eureka Community Development Company at ecdc@valleytel.net or 605-284-2130.
