

What's Developing

One of the training sessions that Eureka Community Development Company will be sponsoring in the near future is Succession Planning. It will be for people who want more information on planning for the future of a farm or a business. Specifically information will be given on how an owner, often a parent, can transfer the property to a younger generation. The legal steps that should be taken will be explained.

Also, all questions related to the subject should be brought along and they will be answered.

To preregister call the Eureka Development office at 284-2130 or email at ecdc@valleytel.net. The event will be free for all who attend. Following the preregistration a date will be set that will work for all who plan to attend.
