

## What's Developing

The Daktronics display sign located adjacent to Highway 10 midway through Eureka came about as a Eureka Chamber of Commerce project in 2007. That organization still owns the sign and handles all expenses and billing connected with the sign.

The electronic billboard is currently getting some updates as software is updated to be compatible to newer versions of Windows. The new software will allow more variation in fonts and graphics.

All messages will be programmed into the sign at Dakota Country Store. To get messages on the sign contact Dakota Country Store at 605-284-2382 or [dakotastore@valleytel.net](mailto:dakotastore@valleytel.net). Messages can also be dropped off at the store. A rate sheet is available for costs to run messages. As in the past, no political messages will be displayed and decisions on questionable messages will be made by the programmer and members of the Eureka Chamber of Commerce.

It's never an easy or quick process to change software. Neither is there any option other than to do the upgrades. Those involved extend their thanks for everyone's patience throughout this upgrade.
